

# Královský vodopád (Royal Waterfall)

 **11 km**

 **10,4 km**

 **3,5 h**

 **305 m**

You can reach it along the blue tourist route from Vidly, where you can come by car or bus or on foot from Vrbno – Železná (12.5 km). There is a green hiking trail from Železná. From the Hutě signpost, follow the blue route in the direction of Bílý Potok and further to Vidly along the road. At the point where the stream divides to the waterfall, you must cross this stream (see the map). We recommend that you save the route to your mobile phone via the QR code. There is a bad signal at the place to read data. An ideal time to visit the waterfall (the height of 12 m) is after rain or in spring when snow is melting. Be careful, in this case there is also a lot of water on the route.
